

AJITHESHWAR VADLA

Software Development Engineer II – Frontend

+91 9347966409 | Hyderabad, India | ajitheshwar1923@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Frontend Engineer (SDE-II) specializing in scalable, high-performance Angular applications, with end-to-end ownership of large enterprise modules and proven impact on performance, architecture, and developer productivity. Strong hands-on experience with TypeScript, RxJS, and NGXS, delivering clean, maintainable, and scalable frontend systems.

TECHNICAL SKILLS

Languages & Frontend: JavaScript, TypeScript, Angular, RxJS, NGXS, HTML5, CSS3

Backend & APIs: Node.js, Express, REST APIs

Data, Visualization & Tools: MySQL, Firebase, Highcharts, Git

WORK EXPERIENCE

May 2023 - Present

SDE - II, Product Development - Darwinbox Digital Solutions Pvt. Ltd.

- Owned and delivered the end-to-end Angular revamp of Darwinbox's Time Management module (attendance, leaves, shifts, overtime, timesheets, dashboards), the largest and most business-critical module used daily by all enterprise clients.
- Sole Frontend Engineer for the revamp, migrating a legacy PHP system to a scalable Angular architecture, establishing modular, reusable standards later adopted as the baseline for other module revamps.
- Developed over 100 Angular components, services, and state management layers, implementing complex Workday-scale business logic and data-heavy UI workflows in close collaboration with 13 backend engineers, QAs, PMs, and UX.
- Resolved severe performance bottlenecks (pages rendering thousands of components) by applying OnPush change detection, optimized RxJS pipelines, and efficient state management, cutting load time from ~5s to <1s while scaling to 10x data.
- Designed shared, reusable UI components adopted across teams, accelerating UI development by ~60% and improving consistency and maintainability across the platform.
- Acted as the primary frontend owner post-revamp, partnering with a 30+ member cross-functional team (backend engineers, product managers, and QA) to drive complex UI solutions and technical feasibility, consistently delivering 50+ feature points per quarter over 7+ quarters, with ownership of 15+ medium-to-large frontend initiatives per quarter.
- Recognized with the Best Employee Award (Top <5% company-wide) for exceptional project ownership, high-quality code delivery, and strategic impact on a core product; team later received collective recognition as well.

PROJECTS

Vegetable Vendor App (MEAN Stack, Highcharts, Web Sockets)

Mar 2023

- Full-stack e-commerce app featuring a real-time admin dashboard using Web Sockets for instantaneous updates.
- Implemented complex inventory freshness logic and sales analytics visualized via Highcharts.

Shop Management Portal (Angular, Node.js, MySQL)

June 2021

- Built an admin interface for inventory and catalog management using Angular with a Node.js/Express backend and MySQL for data persistence. Streamlined product and sales tracking workflows

Foundational Skills (Angular, JavaScript, Firebase)

June 2022

- Applied cloud services in a Firebase Storage gallery and algorithms in a Shortest Path Finder visualization.
- Demonstrated logic and state management by developing a responsive 2048 game clone and an Attendance Calculator tool.

EDUCATION

B. Tech - Computer Science and Engineering

2019 - 2023

Jawaharlal Nehru Technological University Hyderabad - JNTUH - CGPA: 8.8

CODING PROFILES

[LeetCode](#) (300+ coding problems) | [Hackerrank](#) (6-star rank in Problem Solving)
